

## CONTENTS of "The Physical Security Diploma"

### Chapter 1: Concepts in Security Risk Management

- 1.1 Taking an Enterprise Security Risk Management Approach
  - 1.1.1 The Benefits of an ESRP Program
- 1.2 Adopting an ESRM Approach
  - 1.2.1 The Context of ESRM
  - 1.2.2 Mission and Vision
  - 1.2.3 Core Values
  - 1.2.4 Operating Environment
  - 1.2.5 Stakeholders
- 1.3 The ESRM Cycle
  - 1.3.1 Identify and Prioritize Assets
  - 1.3.2 Identify and Prioritize Risks
  - 1.3.3 Mitigate Prioritized Risks
  - 1.3.4 Continuous Improvement
- 1.4 The Foundation of ESRM
  - 1.4.1 Holistic Risk Management
  - 1.4.2 Partner with Stakeholders
  - 1.4.3 Transparency
  - 1.4.4 Governance
- 1.5 References

### Chapter 2: Functions of Physical Security

- 2.1 DEFINITION OF PHYSICAL SECURITY and PHYSICAL PROTECTION SYSTEMS
  - 2.1.1. Physical Security
  - 2.1.2. Physical Protection Systems
  - 2.1.3. Protection in depth
  - 2.1.4. A minimum consequence of component failure
  - 2.1.5. Balanced protection
  - 2.1.5. Site Hardening
  - 2.1.6. Security Convergence
- 2.2 FUNCTIONS OF PHYSICAL SECURITY
  - 2.2.1 PHYSICAL SECURITY MEASURES
    - 2.2.1.1 An Overview
    - 2.2.1.2 Elements: Preventive, corrective, and detective measures
  - 2.2.2 ELECTRONIC SECURITY MEASURES
  - 2.2.3 PERSONNEL AND GUARD FORCE SECURITY
- 2.3 PERIPHERAL SYSTEMS AND INTERFACES
- 2.4 Physical Asset Protection Program ("PAP")

- 2.4.1. Scope, Terms, and Definitions
- 2.4.2 General Principles
- 2.4.3. Establishing the Framework
- 2.4.4 LEADERSHIP AND GOVERNANCE
- 2.4.5 PLANNING
- 2.4.6. IMPLEMENTATION AND OPERATION
- 2.4.7. MONITORING AND MEASUREMENT
- 2.4.8. MANAGEMENT REVIEW
- 2.5. REFERENCES

## **Chapter 3: Planning and Conducting Physical Security Assessments**

- 3.1 General Risk Assessment Models and Considerations
- 3.2 Qualitative and Quantitative Methods
  - 3.2.1 Assets
  - 3.2.2 Evaluating Threats
  - 3.2.3 Vulnerabilities
  - 3.2.4 Risk Analysis
  - 3.2.5 Risk Mitigation
  - 3.2.6 Leveraging Outside Expertise
- 3.3 Physical Security Assessments
  - 3.3.1 What is a Security Survey?
  - 3.3.2 Choosing A Physical Security Assessment Methodology
- 3.4 General Guidelines – Areas to Assess
  - 3.4.1 Typical Areas and Items to Assess
  - 3.4.2 Tests
- 3.5 Applying Assessment Results
- 3.6 Automated Assessment Tools
- 3.7 References

Annex A: Guidance on planning issues related to implementing PPSs. (Patterson, D. 2013. Implementing Physical Protection Systems: A Practical Guide. 2nd ed. Alexandria, VA: ASIS International, Chapter 4)

## **Chapter 4: Measuring Effectiveness: Concepts in Physical Security Metrics**

- 4.1 Understanding Metrics
  - 4.1.1 Benefits of a Security
  - 4.1.2 Designing A Metrics Program
- 4.2 Physical Security Metrics
  - 4.2.1 Physical Security Systems Metrics
  - 4.2.2 Physical Security Personnel Metrics
  - 4.2.3 Physical Security Compliance Metrics in the Public Sector
  - 4.2.4 Presenting Aggregate Status for Physical Security Metrics

- 4.3 Additional Recommended Metrics
- 4.4 Application of Metrics Throughout this Book
- 4.5 References

## **Chapter 5: Basic Design Concepts**

- 5.1 Design Principles
  - 5.1.1 Point Versus Area Security
  - 5.1.2 Conflict Avoidance
  - 5.1.3 Balance
  - 5.1.4 Additional Design Elements
- 5.2 Examples of Design Practices: Good and Not so Good
- 5.3 References

## **Chapter 6: Influencing Factors in Physical Security Design**

- 6.1 Characteristics of the Assets Under Protection
- 6.2 Characteristics of the Building or Facility
  - 6.2.1 Ownership and Occupancy
  - 6.2.2 Purpose of the Facility
  - 6.2.3 Access
- 6.3 Characteristics of the Surroundings
- 6.4 Characteristics of the Location
- 6.5 Additional Influencing Factors
  - 6.5.1 Selecting Mitigation Options Based on Influencing Factors
- 6.6 References

## **Chapter 7: Security Architecture and Engineering**

- 7.1 Design Overview
- 7.2 Codes and Regulations
- 7.3 Project Requirements
- 7.4 Type of Construction
- 7.5 Site Layout
  - 7.5.1 Perimeter
  - 7.5.2 Lighting
  - 7.5.3 Building Design Against Blast
  - 7.5.4 Building Access
- 7.6 Material Selection
  - 7.6.1 Building Structure
  - 7.6.2 Facades
  - 7.6.3 Interior Layout
  - 7.6.4 Glazing

## 7.7 Site Utilities

### 7.7.1 HVAC

### 7.7.2 Emergency Power

### 7.7.3 Other Utilities

## 7.8 Life Safety Systems

### 7.8.1 Evacuation

### 7.8.2 Shelter-In-Place

## 7.9 Publications Relevant to Security Architecture and Engineering

## 7.10 References

# Chapter 8: Integrated Security and Protection Strategies

## 8.1 Integrated Electronic Security Systems

## 8.2 Integrated Physical Security Elements

## 8.3 Integrated Security Programs

## 8.4 Integration of Enterprise Risk Management and Enterprise Security Risk Management

## 8.5 References

# Chapter 9: Structural Security Measures

## 9.1 Barriers

### 9.1.1 Barriers

### 9.1.2 Doors

### 9.1.3 Windows and Other Openings

### 9.1.4 Roofs and Floors

### 9.1.5 Fencing and Perimeter Walls

### 9.1.6 Blocking Barriers

### 9.1.7 Symbolic and Natural Barriers

## 9.2 Containers and Vaults

### 9.2.1 Safes

### 9.2.2 Vaults

## 9.3 Locks and Locking Mechanisms

### 9.3.1 Mechanical Locks

### 9.3.2 Electrified Locking Mechanisms

### 9.3.3 Designing Security Locking Systems

## 9.4 Lighting and Security Applications

### 9.4.1 Types of Lighting Equipment and Lamps

### 9.4.2 Lighting Challenges

### 9.4.3 Characteristics of Light and Lighting

### 9.4.4 Overview of Lighting Systems

### 9.4.5 Economic Considerations

### 9.4.6 Starting and Restrike

- 9.4.7 Security Lighting for Selected Applications
- 9.4.8 Lighting Considerations for Electronic Surveillance Systems
- 9.4.9 Standards for Security Lighting Levels
- 9.5 References

## **Chapter 10: Crime Prevention through Environmental Design**

- 10.1 Principles of CPTED
  - 10.1.1 Criminal Behaviors and Patterns
  - 10.1.2 Later Developments in CPTED
- 10.2 Tools of CPTED
  - 10.2.1 Tools that Address the Three Elements of CPTED
  - 10.2.2 Reducing Crime through Architectural Design
  - 10.2.3 Access Control, Surveillance, and Territorial Reinforcement
- 10.3 CPTED Applications in Various Settings
  - 10.3.1 Commercial Office Buildings
  - 10.3.2 Industrial Buildings and Facilities
  - 10.3.3 Parking Facilities
  - 10.3.4 Schools
  - 10.3.5 Automated Teller Machines (ATMS)
  - 10.3.6 U.S. Federal Buildings
- 10.4 Integration of CPTED and Traditional Security
- 10.5 References

## **Chapter 11: Electronic Security Systems**

- 11.1 Access Control Systems
  - 11.1.1 Personnel Access Control
  - 11.1.2 Locks
- 11.2 Contraband Detection
  - 11.2.1 Metal Detectors
  - 11.2.2 Package Search
  - 11.2.3 Explosives Detection
  - 11.2.4 Chemical and Biological Agent Detection
- 11.3 Physical Intrusion Detection Systems
  - 11.3.1 Performance Characteristics
  - 11.3.2 Standards
  - 11.3.3 Exterior Sensors
  - 11.3.4 Interior Sensors
  - 11.3.5 Intrusion Detection Systems
- 11.4 Video Surveillance
  - 11.4.1 Functional Requirements

- 11.4.2 Uses of Video Subsystems in Security
- 11.4.3 Analog System Components
- 11.4.4 Network Video System Components
- 11.4.5 System Design
- 11.4.6 Equipment Selection
- 11.4.7 Additional Design Considerations for Video Assessment
- 11.4.8 Evaluation of Video Assessment Systems
- 11.4.9 Maintenance
- 11.4.10 Future of Video Surveillance Systems
- 11.4.11 Video Systems — Video Surveillance and Alarms,  
Communications, and Display
- 11.5 Communications and Annunciation Systems
  - 11.5.1 AC&D Attributes
  - 11.5.2 Alarm Communication Subsystem
  - 11.5.3 Security Communications
  - 11.5.4 Alarm Control and Display
- 11.6 Trends and Issues in Electronic Systems Integration
- 11.7 References

## **Chapter 12: Security Officers and the Human Element**

- 12.1 Security Officer Utilization Growth
- 12.2 Contemporary Challenges
- 12.3 Determining the Need for a Security Force
- 12.4 Security Force Models
- 12.5 Basic Security Officer Functions
  - 12.5.1 Access Control
  - 12.5.2 Patrol
  - 12.5.3 Inspection
  - 12.5.4 Monitoring
  - 12.5.5 Emergency Response
  - 12.5.6 Traffic Control
  - 12.5.7 Dealing with Persons with Altered Mental Status
  - 12.5.8 Escort
  - 12.5.9 Special Assignments
  - 12.5.10 Record keeping
- 12.6 Security Officer Roles
  - 12.6.1 Public Relations/Management Representative
  - 12.6.2 Information Collection
  - 12.6.3 Enforcement/Compliance Agent
  - 12.6.4 Legal Consultant
  - 12.6.5 Physical Security Specialist

- 12.7 Uniforms and Equipment
  - 12.7.1 Weapons
- 12.8 Security Officer Selection
  - 12.8.1 ASIS Guideline PSO–2019
  - 12.8.2 Personal Attributes
- 12.9 Security Officer Training
  - 12.9.1 Benefits of Training
  - 12.9.2 Identifying Training Requirements

## **Chapter 13: Principles of Project Management**

### **Chapter 14: Project Management: Systems Design**

Introduction: Project Management for Physical Protection Systems

- 14.1 System Design Principles
- 14.2 Initial Phases
- 14.3 Design Phases
  - 14.3.1 Development of Design Criteria
  - 14.3.2 Basis of Design
  - 14.3.3 Conceptual Design
  - 14.3.4 Design and Documentation
  - 14.3.5 Specification
  - 14.3.6 Drawings
  - 14.3.7 Hardware Schedules
  - 14.3.8 Design Coordination
- 14.4 Contracting
  - 14.4.1 Initial Budget
  - 14.4.2 Estimation Considerations
  - 14.4.3 Types of Cost Estimates
  - 14.4.4 Life-Cycle Cost
  - 14.4.5 Sample Estimate
- 14.5 The Role of Consultants in System Design
- 14.6 Video Systems
  - 14.6.1 The First Evolution: Analog to Digital
  - 14.6.2 The Second Evolution: Standard Resolution to Megapixel
  - 14.6.3 Processed Video, Video Analytics, and Intelligent Video
  - 14.6.4 Video Systems Integration
- 14.7 Merging Legacy Systems
  - 14.7.1 Access Control Systems
  - 14.7.2 Legacy Video Systems

- 14.7.3 Legacy Intercom Systems
- 14.7.4 Security Networks and Legacy Integration
- 14.8 Procurement
  - 14.8.1 Procurement Forms
  - 14.8.2 Procurement Process
- Annex A: “Design and Estimating” (Implementing Physical Protection System: A practical Guide, 2nd Ed. David Patterson, CPP, PSP” Chapter 5)
- Annex B: “Procurement” (Implementing Physical Protection System: A practical Guide, 2nd Ed. David Patterson, CPP, PSP” Chapter 6)

## **Chapter 15: System Implementation**

- 15.1 Site Preparation
- 15.2 Contractor Coordination
- 15.3 Installation
  - 15.3.1 Installation and Operation
  - 15.3.2 Component Installation
  - 15.3.3 Other Features and Considerations
  - 15.3.4 Tuning the Alarm System
- 15.4 Testing and Warranty Issues
  - 15.4.1 Predelivery or Factory Acceptance Testing
  - 15.4.2 Site Acceptance Testing
  - 15.4.3 Reliability or Availability Testing
  - 15.4.4 Post-Implementation Testing
  - 15.4.5 Warranty Issues
- 15.5 Training
  - 15.5.1 General Training Requirements
  - 15.5.2 Training Topics
- 15.6 References
  - Annex A: Installation, Operation, and Training (Implementing Physical Protection System: A practical Guide, 2nd Ed. David Patterson, CPP, PSP” Chapter 7)
  - Annex B: “Commissioning and Warranties” (Implementing Physical Protection System: A practical Guide, 2nd Ed. David Patterson, CPP, PSP” Chapter 8)

## **Chapter 16: Follow-On and Support Activities**

- 16.1 Maintenance
  - 16.1.1 Remedial Maintenance
  - 16.1.2 Preventive Maintenance
- 16.2 Evaluation
- 16.3 Replacement

Annex: Maintenance, Evaluation, and Replacement (Implementing Physical Protection System: A practical Guide,2nd Ed.David Patterson, CPP, PSP” Chapter 9)

## **Chapter 17: Business Continuity Management**

17.1 Scope

17.2 Normative references

17.3 Terms and Definitions

17.4 General

17.5 Establishing

17. 5.1 Scope of the BCM Program

17. 5.2. Legal and Other Requirements

17. 6. Management Commitment

17.6.1 Business Continuity Policy

17.7. Planning

17.7.1 General

17.7.2. Risk Assessment

17.7.3 Business Impact Analysis (BIA)

17.7.4 Business Continuity Objectives and Targets

17.7.5Business Continuity Strategies

17.8. Implementation and Operation

17.8.1. Resources

17.8.2 Roles, Responsibilities, and Authorities

17.8.3 Response and Recovery Teams

17.8.4 Competence, Training, and Awareness

17.8.5 Developing and Implementing Business Continuity Plans and Procedures

17.8.6 Documentation

17.8.7 Communication and Consultation

17.9. Monitoring and Measurement

17.9.1. Corrective Action

17.9.2 Preventive Action

17.9.3 Exercises and Testing

17.10. Management Review

17.10.1. Review Input

17.10.2 Review Output

17.10.3 Continuous Improvement

Appendix A: Key Terms and Definitions

Appendix B: Physical Security and Life Safety Considerations in High-Rise Buildings

Appendix C: Standards in Security
